	12:30-14:00	Lunch Break		
ES	14:00 - 15:00	Roundtable 1: Green industrial skills for a better world UNIDO Chair: H.E. Moussa Dosso, Minister for Vocational Training, Cote d'Ivoire (tbc) As we enter the 21st century, humanity faces enormous challenges in the sustainability of our current		
ROUNDTABLES		lifestyles and systems. There are a number of critical global environmental issues including energy, pollution, transportation, agriculture, land use, construction, water access and use, and ecological destruction. Every day, engineers, technicians and scientists make technical decisions which have a significant impact on the environment. These decisions can either move us in the direction of sustainability or contribute to the growing problems. This roundtable will discuss how green industrial skills can be defined and how can green practices and technology can help to move the products, processes, and systems developed by society towards sustainability. Topics: UNIDO Green Industry Platform Green engineering Development of green industrial skills		

experiences with the implementation of green skills in developing countries. The introductory input gives an overview about national and international trends and challenges concerning green jobs, greer skills development and employment and focuses on renewable energy (efficiency). Furthermore it outlines what role Technical Vocational Education and Training (TVET) can play for achieving sustainable development. To strengthen the south-south exchange and cooperation representatives from Mozambique and South Africa are going to share their experiences with us regarding green skills development for renewable energy. They will also discuss the possibilities and limitations of the transferability of their approaches. Topics: German priorities and approaches in green skills development Green skills development in selected BMZ partner countries Break Roundtable 3: The WorldSkills competitions and how to sustain the industry through green skills competition development WorldSkills Organizations Chair: Tjerk Dusseldorp, Board Chair WorldSkills Foundation & WorldSkills International President 2003 – 2011 Education and training is the key entry point to the world of work, to prosperity and social cohesion in societies. WorldSkills as the unique leading global organization promotes vocational education and skills excellence by the transmission means of skills competitions through its members and industry partners. Today's worldwide ambition of transition to green economies and sustainable societies and thus the rapidly changing development of modern technologies in the environmental industry require revision of skills needs and adaption of the labor market. The WorldSkills Movement takes those developments into consideration by greening skills competition disciplines in industry and			
This roundtable aims to set additional impulses for the discussion and to introduce and to discuss experiences with the implementation of green skills in developing countries. The introductory input gives an overview about national and international trends and challenges concerning green jobs, greer skills development and employment and focuses on renewable energy (efficiency).
