

Construction OS&H

A training course for construction clients

Follow up

The form below is a simple way of assessing how much of the material taught in the training course has been applied by each course participant (or each of a sample of participants) in practice. It should of course be used to stimulate a broader discussion on the effectiveness of the training, which should be summarised and recorded for future use. This should not be a postal exercise; the Tutor should visit the participants if possible, but otherwise should discuss it by phone [or in the digital spirit of **Construction OS&H**, perhaps by using Skype (www.skype.com)].

Module	Proportion used [tick <input type="checkbox"/> one box for each module]			
	All of it	Most of it	Some of it	None of it
A: Principles				
B: Duties				
C: Management				
D: Workers				
E: Processes				
F: Planning				
G: Environment				
H: Welfare				
I: Project				
J: Conclusion				
<p>Please give any examples of how you have applied something that you learned, which have made a practical improvements to OS&H in your organisation.</p>
