

# Construction OS&H

## A training course for construction clients

## Preliminary quiz

This short quiz will help the Course Tutor to teach and lead this course in a way that responds more specifically to your existing knowledge. Please answer the questions carefully but feel free to express your own understanding.

1. Why should the client of a construction programme get involved with Occupational Safety and Health?
2. How can the client of a construction project try to ensure that the project is managed in such a way as to ensure that everyone involved is in a safe and healthy environment?

3. What part can the designers of the permanent works influence the occupational safety and health of the project.

4. Explain what is meant by a 'Hazard' in the context of occupational safety and health.

5 Explain what is meant by a 'Risk' in the context of occupational safety and health.

6 Describe the main points that you would expect to find in an Occupational Safety and Health Plan for a construction project.

- 7 What are the main elements of an occupational safety and health management system?
- 8 A project goes through several phases between the first idea and the completed works. Suggest what these phases may be.

- 9 List the five most important welfare facilities required on a large construction project

10. What is a 'site induction course' and what information should it contain?
